Detected Lab Values

```
{
  "Hemoglobin" : 13
  "Blood Sugar" : 190
  "Cholesterol" : 210
}
```

🧠 Plain English Explanation

- Your blood sugar level is high, which may indicate diabetes risk.
- Your cholesterol level is high, which may increase heart disease risk.

❓ Questions You May Ask Your Doctor

- Am I at risk of developing diabetes?
- Do I need medication or lifestyle changes to control blood sugar?
- How often should I monitor my blood sugar levels?
- Does my cholesterol level increase my risk of heart disease?
- What dietary changes can help reduce my cholesterol?
- Should I take cholesterol-lowering medication?
